

# SpO2 Cable for MediByte **REF** 8898, 8900

**Intended Use:** BRAEBON SpO2 Cable for MediByte is for use during sleep disorders studies as a quantitative measure of peripheral capillary oxygen saturation for recording with the MediByte.

## Cleaning

**Caution:** Never steam autoclave or gas sterilize the device.

1. Wipe all patient-contact surfaces with a soft cloth damp with a mild detergent or a 10%bleach/90% water solution.
2. Allow the sensor to dry.

## Warranty

BRAEBON MEDICAL CORPORATION warrants to the first consumer that the SpO2 sensor (the "Sensor"), when shipped in its original container, will be free from defective workmanship, performance and materials and agrees that it will, at its option, either repair the defect or replace the defective Sensor or part thereof at no charge to the purchaser for parts or labor for a time period of twelve months from the date of purchase. The warranty described herein shall be the sole and exclusive warranty granted by BRAEBON MEDICAL CORPORATION and shall be the sole and exclusive remedy available to the purchaser. Improper disinfection will void the warranty. Use of the Sensor constitutes total and complete acceptance of this warranty. Correction of defects, in the manner and for the time period described herein, shall constitute complete fulfillment of all liabilities and responsibilities of BRAEBON MEDICAL CORPORATION to the purchaser with respect to the Sensor and shall constitute full satisfaction of all claims, whether based on contract, negligence, strict liability or otherwise. In no event shall BRAEBON MEDICAL CORPORATION be liable, or in any way responsible, for any loss of revenues or damage, direct, incidental, or consequential, including property damage, loss of profit, or personal injury resulting from the use or misuse of, or the inability to use this product. Nor shall BRAEBON MEDICAL CORPORATION be liable, or in any way responsible, for any damages or defects in the Sensor which were caused by abuse, misuse, tampering, neglect, incorrect battery type, or repairs or attempted repairs performed by anyone other than an authorized service provider.

**de:** SpO2 Messkabel für MediByte x ist für Studien zu Schlafstörungen als Maß für die periphere kapillare Sauerstoffsättigung zur Aufzeichnung mit dem MediByte bestimmt.

### Reinigung

 **Achtung:** Das Gerät niemals im Dampfautoklaven oder mit Gas sterilisieren.

Wischen Sie alle mit dem Patienten in Berührung kommenden Oberflächen mit einem weichen Tuch ab, das Sie mit einem milden Reinigungsmittel oder einer 10% igen Bleichmittel- / 90% igen Wasserlösung angefeuchtet haben.

**es:** El cable de SpO2 para MediByte se usa durante estudios de trastornos del sueño como una medida de la saturación de oxígeno capilar periférica para el registro con el MediByte.

### Limpieza

 **Precaución:** Nunca vaporice el autoclave o esterilice con gas el dispositivo.

Limpie todas las superficies en contacto con el paciente con un paño suave humedecido con un detergente suave o una solución de lejía al 10% / agua al 90%. Dejar secar.

**fr:** Le câble SpO2 pour MediByte est destiné à être utilisé pendant les études sur les troubles du sommeil en tant que mesure de la saturation en oxygène capillaire périphérique pour l'enregistrement avec le MediByte.

### Nettoyage

 **Attention:** Ne jamais stériliser à la vapeur à l'autoclave ou au gaz.

Essuyez toutes les surfaces en contact avec le patient avec un chiffon doux et humide avec un détergent doux ou une solution d'eau de Javel à 10%. Laisser sécher.

**It:** Il cavo SpO2 per MediByte deve essere utilizzato durante gli studi sul disturbo del sonno come misura della saturazione capillare di ossigeno periferica per la registrazione con MediByte.

### Pulizia

 **Attenzione:** mai sterilizzare a vapore in autoclave o gas il dispositivo.

Pulire tutte le superfici di contatto con il paziente con un panno morbido inumidito con un detergente delicato o con una soluzione di candeggina al 10% / 90% di acqua. Lasciare asciugare.

**pt:** O cabo de SpO2 para MediByte é para uso durante estudos de distúrbios do sono como uma medida de saturação de oxigênio capilar periférico para registro com o MediByte.

### Limpeza

 **Cuidado:** Nunca autoclave a vapor ou esterilize a gás no aparelho.

Limpe todas as superfícies de contato com o paciente com um pano úmido macio com um detergente neutro ou uma solução de água sanitária a 10% / 90%. Deixe secar.

**ru:** Кабель SpO2 для MediByte предназначен для использования во время исследований нарушений сна в качестве меры насыщения периферических капилляров кислородом для записи с помощью MediByte.

### уборка

 **Осторожно:** Никогда не стерилизуйте устройство в автоклаве и не стерилизуйте газом.

Протрите все контактирующие с пациентом поверхности мягкой тканью, смоченной мягким моющим средством или 10% -ным отбеливателем / 90% -ным водным раствором. Дать высохнуть.

**nl:** SpO2-kabel voor MediByte is bedoeld voor onderzoek tijdens slaapstoornissen als een maat voor de perifere capillaire zuurstofsaturatie voor opname met de MediByte.

### schoonmaak

 **Let op:** sta het apparaat nooit in een autoclaaf of gassteriliseerapparaat.

Veeg alle oppervlakken van de patiënt met een zachte doek af met een mild reinigingsmiddel of een oplossing van 10% bleek / 90% water. Toegestaan om te drogen.
